

# **Mark Scheme for January 2012**

---

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

## Annotations

Annotation	Meaning
	Correct answer
	Incorrect response
	Benefit of Doubt
	Not Benefit of Doubt
	Error Carried Forward
	Given mark
	Underline (for ambiguous/contradictory wording)
	Omission mark
	Ignore
	Correct response (for a QWC question)
	QWC* mark awarded

Question			Answer	Marks	Guidance
1	(a)	(i)	<u>N</u> ;	1	<b>IGNORE</b> nitrogen <b>DO NOT CREDIT</b> n or N <sub>2</sub>
1	(a)	(ii)	polypeptide / protein ;	1	<b>Mark the first answer.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b> <b>IGNORE</b> peptide
1	(a)	(iii)	<p><i>name</i></p> <p><u>peptide</u> (bond / link) ;</p> <p><b>plus any two from ...</b></p> <p><i>description of formation</i></p> <p>between, amine group (of one amino acid) and carboxyl group (of another) ;</p> <p>H (from amine) combines with OH (from carboxyl) ;</p> <p>condensation (reaction)</p> <p><b>OR</b></p> <p>water, lost / eliminated / produced / created / AW ;</p>	3 max	<p>Maximum two marks for description. Name must be given to award 3 marks.</p> <p><b>ACCEPT</b> marking points from diagram where amine and carboxyl groups are clearly labelled.</p> <p><b>Mark writing first then look at diagram.</b></p> <p>If diagram contradicts creditable text award maximum one mark for description.</p> <p><b>DO NOT CREDIT</b> dipeptide</p> <p><b>ACCEPT</b> phonetic spellings of amine and carboxyl</p> <p><b>ACCEPT</b> 'carboxylic acid' and 'amino'</p> <p><b>DO NOT CREDIT</b> amide / carbonyl</p>

Question			Answer	Marks	Guidance
1	(b)	(i)	<p><b>V1</b> <u>high latent heat</u> of vaporisation / large amount of energy required to change from liquid to gas / AW ;</p> <p><b>V2</b> <u>evaporation</u> is (efficient) cooling mechanism / AW ;</p> <p><b>V3</b> example of cooling in living organism ;</p> <p><b>H1</b> high specific heat capacity / large amount of energy needed to, raise / change, temperature ;</p> <p><b>H2</b> (thermally) stable environment for, aquatic / named aquatic, organisms ;</p> <p><b>H3</b> (aquatic) organisms use less <u>energy</u> on temperature control ;</p> <p><b>H4</b> (internal) temperature of organisms changes only slowly ;</p> <p><b>H5</b> (biological) reactions / enzymes / metabolism, function(s) correctly ;</p> <p><b>F1</b> ice, is less dense than water / floats ;</p> <p><b>F2</b> (surface of) ice provides habitat for, organisms / named organism ;</p>	8 max	<p>Annotate property (number 1) marks with <input checked="" type="checkbox"/> 1 symbol to help distinguish marks for QWC</p> <p>All marks are stand alone</p> <p><b>V1 ACCEPT</b> 'large amount of heat needed...'</p> <p><b>V1 ACCEPT</b> 'high latent heat of evaporation'</p> <p><b>V2 ACCEPT</b> 'evaporation removes heat from body'</p> <p><b>V3</b> e.g. sweating, panting, transpiration (as cooling)</p> <p>'high latent heat of evaporation means sweat cools you down' = 3 marks</p> <p><b>H1 ACCEPT</b> 'water / it, is thermally stable'</p> <p><b>H1 ACCEPT</b> 'water is slow to change temperature'</p> <p><b>H1 CREDIT</b> 'the temperature of the sea does not change much'</p> <p><b>H2</b> 'thermally' can be inferred from previous statement</p> <p><b>H5 IGNORE</b> 'organisms function correctly'</p> <p><b>F1 ACCEPT</b> 'maximum density is at 4°C'</p> <p><b>F2</b> e.g. 'polar bears on ice'</p>

Question	Answer	Marks	Guidance
	<p><b>I1</b> water (beneath ice), insulated / remains liquid / doesn't freeze ;</p> <p><b>I2</b> (aquatic) organisms, do not freeze / can still swim ;</p> <p><b>S1</b> (effective) solvent ;</p> <p><b>S2</b> medium for reactions / (internal) transport medium / able to dilute toxic substances ;</p> <p><b>C1</b> cohesion / adhesion ;</p> <p><b>C2</b> example of cohesion / adhesion, in living organism ;</p> <p><b>T1</b> surface tension ;</p> <p><b>T2</b> habitat for (named) invertebrates ;</p> <p><b>P1</b> transparent ;</p> <p><b>P2</b> allows underwater photosynthesis ;</p> <p><b>D1</b> idea of high density ;</p> <p><b>D2</b> allows flotation / support ;</p> <p><b>U</b> organisms can still obtain, oxygen / (named) minerals / food / carbon dioxide, from water ;</p>		<p><b>I2 IGNORE</b> unqualified references to survival</p> <p><b>I2 ACCEPT</b> gametes / AW, can be dispersed</p> <p><b>C2</b> e.g. transpiration stream / apoplast movement</p> <p><b>C2 ACCEPT</b> descriptions</p> <p><b>T2 ACCEPT</b> insects <b>IGNORE</b> animals</p> <p><b>P2 ACCEPT</b> other example of transparency linked to survival, e.g. eyes</p> <p><b>D1 IGNORE</b> references to viscosity</p> <p><b>U</b> not linked to a single property and so cannot contribute to <b>QWC</b></p> <p><b>U IGNORE</b> nutrients / nutrition</p>

Question	Answer	Marks	Guidance
	<b>QWC:</b> a property mark (with number 1) and a survival mark with the same letter seen twice.	1	e.g. H1 and H3 <b>and</b> S1 and S2

Question			Answer	Marks	Guidance
1	(b)	(ii)	<p><b>1</b> protein <u>secondary</u> structure / <math>\alpha</math>-helix / <math>\beta</math>-pleated sheet ;</p> <p><b>2</b> (protein) <u>tertiary</u> structure ;</p> <p><b>3</b> between polypeptide chains in (named) quaternary structure ;</p> <p><b>4</b> (between chains of) cellulose ;</p> <p><b>5</b> (between, strands of / bases in) DNA ;</p> <p><b>6</b> AVP ; ; ;</p>	3 max	<p><b>Mark the first answer on each prompt line.</b></p> <p><b>3</b> e.g. between adjacent chains in collagen</p> <p><b>CREDIT</b> 'protein / named protein / enzyme' OR 'between amino acid R-groups' once <b>ONLY if <u>none</u> of mps 1-3 have been awarded</b></p> <p><b>4 IGNORE</b> macrofibrils</p> <p><b>6</b> e.g. between mRNA and tRNA binding between enzyme and substrate (coiling of) amylose between DNA and mRNA during transcription</p>
			<b>Total</b>	<b>17</b>	

Question		Answer	Marks	Guidance
2	(a)	<p><b>1</b> nucleus / nuclei ;</p> <p><b>2</b> other named organelle / membrane bound organelles ;</p> <p><b>3</b> linear chromosomes ;</p> <p><b>4</b> DNA, associated with / AW, histones / protein ;</p> <p><b>5</b> 80S / 22nm / large, ribosomes ;</p> <p><b>6</b> large cells / AW ;</p> <p><b>7</b> no cell wall ;</p>	2 max	<p><b>Mark the first answer on each prompt line.</b></p> <p><b>ACCEPT</b> ora throughout</p> <p><b>1 ACCEPT</b> 'DNA not free'</p> <p><b>2</b> e.g. mitochondria / Golgi / etc</p> <p><b>2 ACCEPT</b> compartmentalized organelles</p> <p><b>2 ACCEPT</b> don't have a mesosome</p> <p><b>4 ACCEPT</b> 'DNA not naked'</p>
2	(b)	<p>capital letter on, specific name / Vivax ;</p> <p>not italicised / not underlined ;</p>	1 max	<p><b>Mark the first answer</b></p> <p><b>ACCEPT</b> ora for what student should have typed</p> <p><b>ACCEPT</b> 'the parasite is Plasmodium falciparum / malariae / ovale' if candidate uses capital 'P' and lower case 'f / m / o'</p>
2	(c)	(i)	3 max	<p><b>IGNORE</b> references to stages of life-cycle</p> <p><b>Max 2 if virus / bacterium appears anywhere</b></p> <p><b>3 IGNORE</b> case of initial 'P'</p> <p><b>3</b> Must be in context of transmission from mosquito <b>to</b> human</p> <p><b>4</b> 'blood' can be inferred, e.g. from refs to anticoagulant</p> <p><b>4 IGNORE</b> ref to parasite in blood after liver</p>

Question			Answer	Marks	Guidance
2	(c)	(ii)	destruction of a species is, morally / ethically, wrong ; might cause unintended health problems in humans ; might harm, other / unintended, species ; <i>idea of bioaccumulation / biomagnification ;</i>	1 max	<b>Mark the first suggestion</b>  <b>IGNORE</b> 'might enter human food' unqualified Answers must imply idea of harm

Question			Answer	Marks	Guidance
2	(c)	(iii)	<p><i>Field investigation</i></p> <p><b>F1</b> (sampling) before and after insecticide treatment ;</p> <p><b>F2</b> <i>idea of</i> , unbiased / random, sampling of population ;</p> <p><b>F3</b> example of sampling technique ;</p> <p><b>F4</b> (sampling in) different, times / weather ;</p> <p><b>F5</b> <u>large</u> number of samples taken ;</p> <p><b>F6</b> <i>idea of</i> standardised sampling procedure ;</p> <p><b>F7</b> <i>idea of</i> preventing counting same individual more than once ;</p> <p><b>F8</b> <i>idea of</i> capture – recapture ;</p> <p><b>F9</b> calculate mean / calculate standard deviation / apply statistical test ;</p>	5 max	<p>Award marks for either a field or laboratory investigation – <b>must read whole answer before beginning to mark to decide if field or laboratory.</b></p> <p>If candidates answer in terms of incidence of malaria award no marks as question states population of mosquitoes but read whole question in case mosquito study described in addition.</p> <p>If the investigation is in the both field and laboratory mark the investigation which gives candidate most marks.</p> <p><b>F1 IGNORE</b> refs to treated and untreated areas as stem refers to ‘a population’</p> <p><b>F3</b> e.g. sweep net, pond net, light trap <b>F3 ACCEPT</b> insect net <b>F3 IGNORE</b> ‘net’ or ‘trap’ unqualified</p> <p><b>F4 IGNORE</b> intervals unqualified. Answers must refer to time or weather</p> <p><b>F5</b> Must imply large number or state five or more</p> <p><b>F6 ACCEPT</b> <i>idea of</i> counting by the <u>same method</u></p>

Continued.....

Question			Answer	Marks	Guidance
			<p><b>OR</b></p> <p><i>Laboratory investigation</i></p> <p><i>idea of:</i></p> <p><b>L1</b> with and without insecticide exposure ;</p> <p><b>L2</b> measuring <u>mosquito</u> survival / count surviving mosquitoes ;</p> <p><b>L3</b> controlling one named key variable ;</p> <p><b>L4</b> controlling second named key variable ;</p> <p><b>L5</b> <i>idea of using a range of insecticide <u>concentrations</u> ;</i></p> <p><b>L6</b> replicates ;</p> <p><b>L7</b> calculate <u>mean</u> / calculate standard deviation / apply statistical test ;</p>		<p>Laboratory investigation could be done outside</p> <p><b>L1</b> is for changing the independent variable</p> <p><b>L2</b> is for measuring the dependent variable <b>ACCEPT</b> count the number of dead ones</p> <p><b>L3 and L4</b> <i>award up to 2 marks for</i></p> <ul style="list-style-type: none"> <li>exposure time</li> <li>species of mosquito</li> <li>stage of mosquito life cycle</li> <li>sex of mosquito</li> <li>number of mosquitos</li> <li>insecticide type</li> <li>insecticide concentration</li> <li>volume of insecticide</li> <li>temperature</li> </ul> <p><b>L6</b> Minimum of 3 in total, i.e. original plus two</p> <p><b>L7 IGNORE</b> average</p>
			<b>Total</b>	<b>12</b>	

Question			Answer	Marks	Guidance
3	(a)		<p>regulates fluidity of / stabilises / AW, membranes / phospholipid bilayer ;</p> <p>(converted to) steroid / named steroid, hormone(s) ;</p> <p>waterproofing the skin ;</p> <p>making Vitamin D ;</p> <p>making bile (salts) ;</p>	2 max	<p><b>Mark the first answer on each prompt line.</b></p> <p><b>ACCEPT</b> decreases / maintains, fluidity</p> <p><b>ACCEPT</b> supports structure of membranes</p> <p><b>DO NOT CREDIT</b> makes membrane rigid</p> <p><b>DO NOT CREDIT</b> allows / increases fluidity</p>
3	(b)	(i)	<p>contains C and H and O ;</p> <p>has, OH / hydroxyl, groups ;</p> <p>hex / 6-membered, ring ;</p>	1 max	<p><b>Mark the first answer.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b></p> <p><b>DO NOT CREDIT</b> C, H and O molecules</p> <p><b>DO NOT CREDIT</b> hexose</p> <p><b>ACCEPT</b> pent ring</p> <p><b>IGNORE</b> 6C ring</p> <p><b>IGNORE</b> branched</p>
3	(b)	(ii)	<p>(saturated) lipids / fats / triglycerides ;</p> <p>protein / polypeptide ;</p>	2	<p><b>Mark the first two suggestions</b></p> <p><b>DO NOT CREDIT</b> unsaturated (fats)</p> <p><b>IGNORE</b> fatty acids / glycerol</p> <p><b>IGNORE</b> amino acids / peptides</p>

Question	Answer	Marks	Guidance
(iii)	<p><i>LDL</i></p> <p><b>L1</b> (carry cholesterol) from liver to, tissues / cells ;</p> <p><b>L2</b> receptors on (tissue) <u>cells</u> ;</p> <p><b>L3</b> raise / AW, <u>blood</u> cholesterol ;</p> <p><b>L4</b> increase / cause, deposition of, fats / lipids / triglycerides / cholesterol, <u>in</u> artery wall / under endothelium ;</p> <p><b>L5</b> form, plaques / atheromas ;</p> <p><i>HDL</i></p> <p><b>H1</b> (carry cholesterol) from, tissues / body / blood, to liver ;</p> <p><b>H2</b> receptors on, hepatocytes / liver <u>cells</u> ;</p> <p><b>H3</b> lower / reduce / decrease, (blood) cholesterol ;</p> <p><b>H4</b> reduce deposition, of fats / lipids / triglycerides / cholesterol ;</p> <p><b>H5</b> decrease, formation / risk, of, plaques / atheromas ;</p>	6 max	<p>If it is clear that candidates get LDL and HDL the wrong way round do not award L1 or H1 or QWC and then apply <b>ECF</b></p> <p><b>L3 IGNORE</b> deposits cholesterol</p> <p><b>L4 IGNORE</b> LDL / fatty acids <b>L4 ACCEPT</b> under epithelium</p> <p><b>H1 ACCEPT</b> back to liver</p> <p><b>H3 ACCEPT</b> remove from blood</p> <p><b>H4 IGNORE</b> LDL / fatty acids</p> <p><b>H5 IGNORE</b> removing atheromas</p>
	<b>QWC</b> – Award if you award an L mark and an H mark with the same number twice	1	e.g. L1 and H1, <b>and</b> L3 and H3

Question		Answer	Marks	Guidance
	(c) (i)	(red) meat <u>contains</u> (large amounts of) <u>saturated</u> , fat / fatty acids ;  (meat / saturated fat) associated with / leads to, increased / large amounts of, LDLs ;	2	<b>ACCEPT</b> ora throughout for consequences of non-red meat diet No <b>ECF</b> from 3 (b) (iii) <b>ACCEPT</b> animal fat is saturated fat  <b>CREDIT</b> high LDL/HDL ratio <b>IGNORE</b> makes LDLs unqualified answer must imply increased amount
	(ii)	(type 2) diabetes ; angina / coronary heart disease / CHD / stroke / hypertension / high blood pressure / obesity ;	1	<b>Mark the first answer.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b>  <b>DO NOT CREDIT</b> type 1 diabetes <b>IGNORE</b> conary <b>DO NOT CREDIT</b> chronic
		<b>Total</b>	<b>15</b>	

Question		Answer	Marks	Guidance
4	(a)	taxonomy / taxonomic ; hierarchy ; phylogeny / phylogenetic ;	3	<b>Mark the first answer.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b> <b>ACCEPT</b> phonetic spelling throughout <b>ACCEPT</b> hierarchical system
	(b)	(i)	2 max	<b>Mark the first answer on each prompt line.</b>  <b>1 DO NOT CREDIT</b> absence of a qualified cell wall, e.g. 'no cellulose cell wall' <b>2 ACCEPT</b> phonetic spelling  <b>3 ACCEPT</b> named eukaryotic cell feature  <b>4 IGNORE</b> references to tissues  <b>6 DO NOT CREDIT</b> unqualified references to movement <b>ACCEPT</b> refs to mobility during part of life cycle <b>IGNORE</b> cilia / flagella
		(ii)	1	<b>Mark the first answer.</b> If the answer is correct and an additional answer is given that is incorrect or contradicts the correct answer then = <b>0 marks</b> <b>IGNORE</b> case of initial letter
		Eukaryota(e) / Eukarya / eukaryote(s) ;		

Question		Answer	Marks	Guidance
	(iii)	<p>1 <u>all</u> are in same <u>family</u> as all, are closely related ;</p> <p>2 kea and kaka are both, same genus / <i>Nestor</i> ; <b>ora</b> for kakapo</p> <p>3 kea and kaka, are more closely related / share more recent common ancestor, (than with kakapo) ;</p> <p>4 kea and kaka have <u>more</u> genes in common / AW (than with kakapo) ;</p> <p>5 example of genetic similarity (between kaka and kea) evident from Fig 4.1 ;</p> <p>6 differences between, kea and kaka / all three, are great enough for each to be described as a different <u>species</u> ;</p>	4 max	<p><i>Candidates may refer to individual species using common or scientific names. <b>ACCEPT</b> use of either or both. <b>IGNORE</b> case of initial letter</i></p> <p>1 idea of link between family and close relationship must be made</p> <p>3 <b>ACCEPT</b> ora for less close relationship between kakapo and others</p> <p>4 <b>ACCEPT</b> ora</p> <p>4 Answers must refer to genes / genetics / DNA</p> <p>4 <b>IGNORE</b> cytochrome c</p> <p>5 E.g. kaka and kea both brown / kaka and kea both have similar shaped beaks</p> <p>5 <b>IGNORE</b> unqualified references to appearance</p>
(c)	(i)	<p>differences ;</p> <p><u>in / within / between</u>, species ;</p>	2	<b>ACCEPT</b> within a population

Question		Answer	Marks	Guidance
(c)	(ii)	genetic differences / different alleles / inherited differences ;  environment / diet / disease ;	2	<b>Mark the first suggestion on each prompt line.</b> <b>ACCEPT</b> different genes <b>ACCEPT</b> mutation <b>ACCEPT</b> sex <b>IGNORE</b> 'different habitat'
(c)	(iii)	only small number have been sampled / AW ;  <i>idea that</i> individuals sampled may not be representative of population ;  data collected when population was larger / smaller population may mean range has changed ;	2	<b>Mark the first two reasons – ignore prompt lines.</b> <b>ACCEPT</b> 'whole population has not been sampled'  <b>IGNORE</b> rare unqualified <b>ACCEPT</b> larger ones more likely to be caught / measured  <b>ACCEPT</b> individuals sampled from one area might be different from average of whole population

Question		Answer	Marks	Guidance
4	(d)	<p><i>Name</i></p> <p><b>1</b> <u>speciation</u> ;</p> <p><i>Mechanism – max 2 marks</i></p> <p><b>2</b> <u>isolation / separation</u>, (of populations) ;</p> <p><b>3</b> further detail of isolating mechanism ;</p> <p><b>4</b> mutation / genetic variation ;</p> <p><b>5</b> natural selection / description of natural selection ;</p> <p><b>6</b> different <u>selection pressure</u>(s) (in different environment) ;</p> <p><b>7</b> (enough) time to allow changes in population to prevent interbreeding / AW ;</p>	3 max	<p><b>1 IGNORE</b> ‘natural selection’ on name line</p> <p><b>2 IGNORE</b> barrier</p> <p><b>3</b> e.g. river, mountain, reproductive, geographical, temporal, polyploidy, qualified barrier</p> <p><b>3 IGNORE</b> allopatric / sympatric unqualified</p> <p><b>5</b> description must mention differential survival <b>and</b> genes being passed on</p> <p><b>6 IGNORE</b> selection pressure unqualified</p> <p><b>6</b> ‘different’ can be described using an example</p>
		<b>Total</b>	<b>19</b>	

Question		Answer	Marks	Guidance
5	(a)	41 667 ; ;	2	<p>Award 2 marks for a correct answer, even if no working shown.</p> <p><b>ALLOW</b> 1 mark for 41 666.666, 41 666.7, 41 666.67, 41 666.667, 41 670, 41 700, 41 666, 41668 or 42 000.</p> <p>If the answer is incorrect <b>ALLOW</b> 1 mark for <math>\frac{2500 \times 100}{6}</math></p>
	(b)	<p><b>1</b> part of <u>ecosystem</u> / <u>habitat</u> for other organisms ;</p> <p><b>2</b> part of food, chain / web ;</p> <p><b>3</b> wood useful for specific purpose ;</p> <p><b>4</b> (potential) source of medicine ;</p> <p><b>5</b> genetic resource ;</p> <p><b>6</b> aesthetic value / give pleasure / beautiful trees ;</p> <p><b>7</b> ethical reason / moral responsibility ;</p> <p><b>8</b> resource for (non-medical) scientific research ;</p>	3	<p><b>Mark the first three reasons regardless of lines</b></p> <p><b>1 IGNORE</b> maintains biodiversity</p> <p><b>2 ACCEPT</b> food source</p> <p><b>2 IGNORE</b> home</p> <p><b>3</b> e.g. making , fences / furniture / boundary marker</p> <p><b>5 ACCEPT</b> description or example but must refer to genes</p> <p><b>6 ACCEPT</b> tourism</p> <p><b>7 ACCEPT</b> <i>idea that</i> they have a right to existence</p> <p><b>7 DO NOT CREDIT</b> 'playing God'</p>

Question		Answer	Marks	Guidance	
	(c)	(i)	not in, natural / normal, <u>habitat</u> / <u>environment</u> ;	1	
		(ii)	<p><b>1</b> most plants produce an excess ;</p> <p><b>2</b> (so) can be collected (from wild) without damaging (wild) , plants / organisms / population / habitat ;</p> <p><b>3</b> take up little space ; <b>ora</b></p> <p><b>4</b> able to store, large numbers / more species ; <b>ora</b></p> <p><b>5</b> easy / cheaper, to transport / AW ; <b>ora</b></p> <p><b>6</b> <i>idea of remaining viable for long periods</i> ; <b>ora</b></p> <p><b>7</b> less susceptible to, disease / pests / environmental change ; <b>ora</b></p>	4 max	<p><b>5 ACCEPT</b> can easily be sent where wanted</p> <p><b>6</b> Answers must have some reference to survival, not just 'can be stored for a long time'</p> <p><b>7 IGNORE</b> recovery / survival , from disease</p> <p><b>7 CREDIT</b> answers that describe (greater) disease resistance as a property of the seeds themselves</p> <p><b>or</b> that the seed bank is a (more) protected environment for the seeds</p> <p><b>IGNORE</b> cheaper unqualified</p>

Question			Answer	Marks	Guidance
5	(c)	(iii)	<p><b>1</b> (maintain / increase) genetic variation / <u>gene pool</u> ;</p> <p><b>2</b> reduced chance of (future), disease / environmental change, affecting (whole) population ;</p> <p><b>3</b> reduces chance of <u>inbreeding</u> ;</p> <p><b>4</b> maintain, <u>geographical</u> variation / <u>varieties</u> / races / strains / subspecies ;</p>	3 max	<p><b>1 ACCEPT</b> different alleles</p> <p><b>1 DO NOT CREDIT</b> different genes</p> <p><b>2 ACCEPT</b> 'so if one dies from a disease some might survive'</p> <p><b>2 ACCEPT</b> 'to get some plants that are resistant to different diseases'</p> <p><b>4 IGNORE</b> variation unqualified</p>
			<b>Total</b>	<b>13</b>	

Question		Answer	Marks	Guidance	
6	(a)		3	<p><b>DO NOT CREDIT</b> if letter is unclear</p> <p><b>DO NOT CREDIT</b> if more than one letter is given</p> <p><b>DO NOT CREDIT</b> if an incorrect letter is given</p> <p><b>DO NOT CREDIT</b> if an incorrect letter is given</p>	
		Characteristics are passed on to the next generation			W ;
		There is a struggle for existence			Y and Z ;
		Individuals with beneficial characteristics are among the few who survive			X and Y and Z ;
	(b)	<p>MRSA / it, is harder to treat / may become untreatable ;</p> <p>potential for, disease outbreak / epidemic / pandemic / killing many people ;</p> <p>developing new / more powerful, <u>antibiotics</u>, is expensive / takes time ;</p>	2 max	<p><b>ACCEPT</b> MRSA / it, can't be killed (by antibiotics)</p> <p><b>ACCEPT</b> antibiotics will no longer work on, MRSA / it</p> <p><b>IGNORE</b> new antibiotics are hard to discover</p>	

Question		Answer		Marks	Guidance
6	(c)	1	fossils show that organisms have changed over time ;	3	<b>1 CREDIT</b> many fossil organisms dissimilar from modern organisms
		2	<i>idea that</i> fossils or rocks can be dated ;		<b>2 ACCEPT</b> idea of fossils in chronological order
		3	<i>idea of</i> fossils showing intermediate forms / sequences ;		<b>3</b> e.g. <i>Archaeopteryx / Tiktaalik / horse</i> <b>3</b> general trend from, small / simple, to, large / complex
			<b>Total</b>	<b>8</b>	

Question		Answer	Marks	Guidance												
7	(a)	<table border="1"> <tr> <td>form part of cellular response</td> <td><i>both</i></td> </tr> <tr> <td>mature in thymus</td> <td>(only) T (lymphocytes) ;</td> </tr> <tr> <td>secrete substances which kill infected cells</td> <td>(only) T (lymphocytes) ;</td> </tr> <tr> <td>manufacture antibodies</td> <td>(only) B (lymphocytes) ;</td> </tr> <tr> <td>undergo clonal expansion</td> <td>both / B and T ;</td> </tr> <tr> <td>activate other lymphocytes</td> <td>(only) T (lymphocytes) ;</td> </tr> </table>	form part of cellular response	<i>both</i>	mature in thymus	(only) T (lymphocytes) ;	secrete substances which kill infected cells	(only) T (lymphocytes) ;	manufacture antibodies	(only) B (lymphocytes) ;	undergo clonal expansion	both / B and T ;	activate other lymphocytes	(only) T (lymphocytes) ;	5	
form part of cellular response	<i>both</i>															
mature in thymus	(only) T (lymphocytes) ;															
secrete substances which kill infected cells	(only) T (lymphocytes) ;															
manufacture antibodies	(only) B (lymphocytes) ;															
undergo clonal expansion	both / B and T ;															
activate other lymphocytes	(only) T (lymphocytes) ;															
	(b) (i)	<p>no antibodies detected before 4 days / antibodies appear at 4 days ;</p> <p>increase then decrease / peak ;</p> <p>figures for peak with time <b>and</b> antibody concentration ;</p> <p>decrease less steep than increase / AW ; <b>ora</b></p> <p>antibody concentration returns to zero <u>at 27</u> days ;</p>	3 max	<p><b>ACCEPT</b> 'around 4 days'</p> <p><b>ACCEPT</b> upper limit of 4.5 days for first appearance of antibodies</p> <p><b>IGNORE</b> 'before 5 days'</p> <p><b>IGNORE</b> references to increase at 4 days, answers must imply none to begin with</p> <p><b>ACCEPT</b> 13 days <math>\pm</math> 0.5 day, 25 units <math>\pm</math> 0.5 units</p> <p><b>ACCEPT</b> 25 au <math>\pm</math> 0.5 au 9 days <math>\pm</math> 0.5 day after initial appearance</p>												

Question			Answer	Marks	Guidance												
7	(b)	(ii)	<p><i>the drawn line should show</i></p> <p>higher peak <b>and</b> steeper initial increase ;</p> <p>antibodies appear between days 30 and 34 <b>and</b> concentration at 60 days above peak for primary response ;</p>	2	<p>Peak must be at least 30 au</p> <p>Compare gradient with initial increase up to day 10</p> <p><b>NBOD</b> if gradients are similar</p> <p><b>ACCEPT</b> ruled line close to vertical</p> <p><b>DO NOT CREDIT</b> vertical</p> <p><b>ACCEPT</b> a line that starts to rise at 30 or 34 days</p>												
7	(c)		<table border="1"> <thead> <tr> <th>region</th> <th>name</th> <th>function</th> </tr> </thead> <tbody> <tr> <td><b>A</b></td> <td>hinge (region) ;</td> <td>flexibility / binding of <u>more than one</u> antigen ;</td> </tr> <tr> <td><b>B</b></td> <td><u>constant</u> / Fc (region) ;</td> <td>attachment / binding , to phagocytes ;</td> </tr> <tr> <td><b>C</b></td> <td>variable / hypervariable / Fab (region) ;</td> <td>binding / attachment , to <u>antigens</u> ;</td> </tr> </tbody> </table>	region	name	function	<b>A</b>	hinge (region) ;	flexibility / binding of <u>more than one</u> antigen ;	<b>B</b>	<u>constant</u> / Fc (region) ;	attachment / binding , to phagocytes ;	<b>C</b>	variable / hypervariable / Fab (region) ;	binding / attachment , to <u>antigens</u> ;	6	<p><b>Marks for name and function should be awarded independently.</b></p> <p><b>DO NOT CREDIT</b> if incorrect answer appears in same box</p> <p><b>ACCEPT</b> hinges / hinged</p> <p><b>ACCEPT</b> neutrophils / macrophages / granulocytes</p> <p><b>ACCEPT</b> monocytes</p> <p><b>IGNORE</b> recognise antigens</p>
region	name	function															
<b>A</b>	hinge (region) ;	flexibility / binding of <u>more than one</u> antigen ;															
<b>B</b>	<u>constant</u> / Fc (region) ;	attachment / binding , to phagocytes ;															
<b>C</b>	variable / hypervariable / Fab (region) ;	binding / attachment , to <u>antigens</u> ;
