edexcel

Mark Scheme (Results)

June 2011

GCE Decision D2 (6690) Paper 1

Edexcel is one of the leading examining and awarding bodies in the UK and throughout the world. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers.

Through a network of UK and overseas offices, Edexcel's centres receive the support they need to help them deliver their education and training programmes to learners.

For further information, please call our GCE line on 0844 576 0025 or visit our website at www.edexcel.com.

If you have any subject specific questions about the content of this Mark Scheme that require the help of a subject specialist, you may find our **Ask The Expert** email service helpful.

Ask The Expert can be accessed online at the following link:

EDEXCEL GCE MATHEMATICS

General Instructions for Marking

1. The total number of marks for the paper is 75.

2. The Edexcel Mathematics mark schemes use the following types of marks:

   - M marks: method marks are awarded for 'knowing a method and attempting to apply it', unless otherwise indicated.
   - A marks: Accuracy marks can only be awarded if the relevant method (M) marks have been earned.
   - B marks are unconditional accuracy marks (independent of M marks)
   - Marks should not be subdivided.

3. Abbreviations

   These are some of the traditional marking abbreviations that will appear in the mark schemes and can be used if you are using the annotation facility on ePEN.

   - bod – benefit of doubt
   - ft – follow through
   - the symbol ^ will be used for correct ft
   - cao – correct answer only
   - cso - correct solution only. There must be no errors in this part of the question to obtain this mark
   - isw – ignore subsequent working
   - awrt – answers which round to
   - SC: special case
   - oe – or equivalent (and appropriate)
   - dep – dependent
   - indep – independent
   - dp decimal places
   - sf significant figures
   - * The answer is printed on the paper
   - ⌊ The second mark is dependent on gaining the first mark

Question Number	Scheme	Marks
	Notes:	
(a)	1M1: One equal sign, P and 320 present 1A1: cao	
(b)	1M1: correct pivot located, attempt to divide row. If choosing negative pivot M0M0 in (b) 1A1: pivot row correct including change of b.v. 2M1: (ft) Correct row operations used at least once or stated correctly. 2A1ft: Looking at non zero-and-one columns, one column ft correct 3A1: cao.	
(c)	1M1: At least 4 values stated. Reading off bottom row, or negative values get M0. 1A1ft: Their four basic variables correct ft from their table. 2A1: cao	

Question Number	Scheme	Marks
4. **(a)**		

	S plays 1	S plays 2	S plays 3
L plays 1	-4	-1	1
L plays 2	3	-1	-2
L plays 3	-3	0	2

Row 3 dominates row 1 so row 1 may be deleted.

	S plays 1	S plays 2	S plays 3
L plays 2	3	-1	-2
L plays 3	-3	0	2

M1

Let Laura play 2 with probability p and 3 with probability (1- p) M1

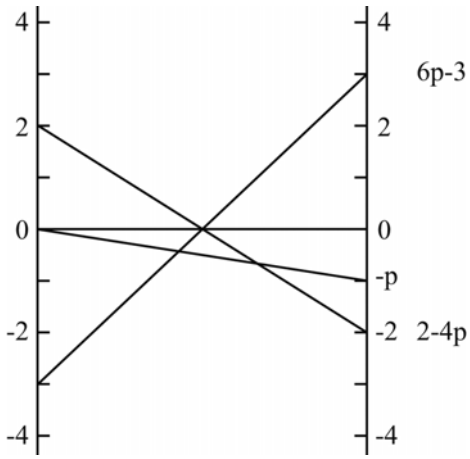
If Sam plays 1: Laura's gain is $3p - 3(1- p) = -3 + 6p$

If Sam plays 2: Laura's gain is $-p + 0\,(1- p) = -p$ A1

If Sam plays 3: Laura's gain is $-2p + 2\,(1- p) = 2 - 4p$

(3)

(b)



B2,1ft,0

(2)

(c)

$-3+6p=-p$ M1

$7p=3$ A1

$p=\frac{3}{7}$

Laura should play row 1: never,

row 2: $\frac{3}{7}$ of the time and

row 3: $\frac{4}{7}$ of the time A1ft

and the value of the game is $-\frac{3}{7}$ to her. A1

(4)

9

Question Number	Scheme	Marks
	Notes:	
(a)	1M1: Matrix reduced correctly. Could be implicit from equations. 2M1: Setting up three probability equations, implicit definition of p. 1A1: CAO	
(b)	1B1ft: At least two lines correct, accept $p>1$ or $p<0$ here. Must both be function of p. 2B1: 3 lines cao, $0 \leq p \leq 1$, scale clear (or 1 line = 1), condone lack of labels. Rulers used.	
(c)	3M1: Finding their correct optimal point, must have three lines, and setting up an equation to find $0 \leq p \leq 1$. 1A1: CAO 2A1ft: All three options listed must ft from their p, check page 1, no negatives. 3A1: CAO	

Question Number	Scheme	Marks
