GCSE METHODS IN MATHEMATICS (LINKED PAIR)

H

Higher Tier Unit 1 Algebra and Probability (Section A)

Wednesday 2 November 2016

Morning

Time allowed: 45 minutes

Materials

For this paper you must have:

- a calculator
- mathematical instruments.

**Instructions**

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- This paper is divided into two sections: Section A and Section B.
- After the 45 minutes allowed for Section A, you must put your calculator on the floor under your seat. You will then be given Section B.
- When you have answered Section B you may work again on Section A but you must **not** use a calculator. It must remain on the floor under your seat.
- At the end of the examination tag Section A and Section B together with Section A on top.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 40
- The quality of your written communication is specifically assessed in Questions 2 and 4. These questions are indicated with an asterisk (*).
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.
- You are expected to use a calculator where appropriate.

Advice

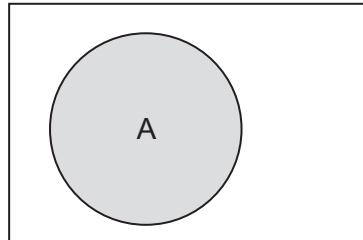

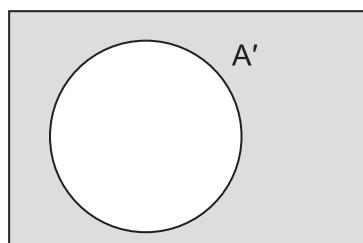

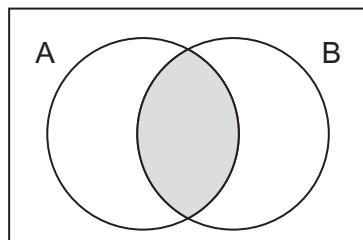

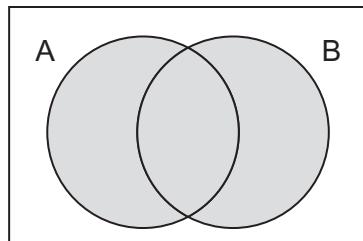

- In all calculations, show clearly how you work out your answer.

A bottle contains 300 beads.
75 of the beads are red.
All the other beads are blue.

The number of red beads is **increased** by $\frac{2}{3}$

The number of blue beads is **decreased** by 20%

Has the total number of beads in the bottle increased?
You **must** show your working.

$$3 \quad \text{Solve} \quad 10x - 7 = 4x + 2$$

[3 marks]

$$x = \underline{\hspace{2cm}}$$

$$^*4 \qquad \qquad T = 5n + 3p$$

n is an integer.
 p is 1 more than n .

Show that T is always an odd number.

Answer _____

7 Three numbers are in the ratio 12 : 13 : 15

The difference between the largest number and the smallest number is 72

Work out the middle number.

The diagram shows a cuboid drawn on a 3D coordinate grid.

M is the midpoint of CP .

The coordinates of M are $(4, 10, 1.5)$

N is the midpoint of DC .

Work out the coordinates of N .

- 9 A biased coin has

$$P(\text{heads}) = \frac{3}{10} \quad \text{and} \quad P(\text{tails}) = \frac{7}{10}$$

The coin is tossed.

If the coin shows heads a counter is picked at random from Bag A.
Bag A contains 2 green counters and 3 white counters.

If the coin shows tails a counter is picked at random from Bag B.
Bag B contains 1 green counter and 4 white counters.

Work out the probability of a green counter being picked.
