# GCSE Methods in Mathematics <br> (Linked Pair) 

Higher Tier Unit 2 Geometry and Algebra Mark scheme

9365
November 2016

Version/Stage: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

## Glossary for Mark Schemes

GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Mathematics papers, marks are awarded under various categories.

| M | Method marks are awarded for a correct method which could lead <br> to a correct answer. |
| :--- | :--- |
| M dep | A method mark dependent on a previous method mark being <br> awarded. |
| A | Accuracy marks are awarded when following on from a correct <br> method. It is not necessary to always see the method. This can be <br> implied. |
| B | Marks awarded independent of method. |
| B dep mark that can only be awarded if a previous independent mark |  |
| has been awarded. |  |

Examiners should consistently apply the following principles

## Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

## Responses which appear to come from incorrect methods

Whenever there is doubt as to whether a candidate has used an incorrect method to obtain an answer, as a general principle, the benefit of doubt must be given to the candidate. In cases where there is no doubt that the answer has come from incorrect working then the candidate should be penalised.

## Questions which ask candidates to show working

Instructions on marking will be given but usually marks are not awarded to candidates who show no working.

## Questions which do not ask candidates to show working

As a general principle, a correct response is awarded full marks.

## Misread or miscopy

Candidates often copy values from a question incorrectly. If the examiner thinks that the candidate has made a genuine misread, then only the accuracy marks ( $A$ or B marks), up to a maximum of 2 marks are penalised. The method marks can still be awarded.

## Further work

Once the correct answer has been seen, further working may be ignored unless it goes on to contradict the correct answer.

## Choice

When a choice of answers and/or methods is given, mark each attempt. If both methods are valid then M marks can be awarded but any incorrect answer or method would result in marks being lost.

## Work not replaced

Erased or crossed out work that is still legible should be marked.

## Work replaced

Erased or crossed out work that has been replaced is not awarded marks.

## Premature approximation

Rounding off too early can lead to inaccuracy in the final answer. This should be penalised by 1 mark unless instructed otherwise.

## Continental notation

Accept a comma used instead of a decimal point (for example, in measurements or currency), provided that it is clear to the examiner that the candidate intended it to be a decimal point.

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 1 | Alternative method 1 |  |  |
| :---: | :---: | :---: | :---: |
|  | $6 \times 6 \times \pi$ | M1 | oe |
|  | $36 \pi$ or [113, 113.112] | A1 |  |
|  | $\mathrm{mm}^{2}$ | B1 |  |
|  | Alternative method 2 |  |  |
|  | $0.6 \times 0.6 \times \pi$ | M1 | oe |
|  | $0.36 \pi$ or [1.13, 1.13112] | A1 |  |
|  | $\mathrm{cm}^{2}$ | B1 |  |

| 2 | Alternative method 1 |  |  |
| :---: | :---: | :---: | :---: |
|  | 0.37 or 1.37 seen | M1 | oe |
|  | $460 \times$ their 1.37 or $460 \times$ their 0.37 or 170.2 | M1 | oe |
|  | 630.2 | A1 |  |
|  | Alternative method 2 |  |  |
|  | $10 \%=46,1 \%=4.6$ | M1 | Any valid percentage stated, eg 5\% = 23 |
|  | $460+3 \times$ Their $10 \%+7 \times$ their $1 \%$ | M1 | Any valid combination, <br> eg $460+4 \times$ their $10 \%-3 \times$ their $1 \%$ |
|  | 630.2 | A1 |  |

| $\mathbf{3}$ (a) | They are alternate angles | B1 |  |
| :--- | :--- | :---: | :--- |

3 (b) $a+b=180 \quad$ B1

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 4 (a) | 60 | B1 |  |
| :---: | :---: | :---: | :---: |
| 4 (b) | Any product, or division, of 210 that involves a prime number, eg $2 \times 105$, $5 \times 42,210 \div 7=30$ etc | M1 |  |
|  | $2 \times 3 \times 5 \times 7$ | A1 |  |
|  | Additional Guidance |  |  |
|  | Product may be implied for M1 by a prime factor tree, or values written as pairs, eg (2, 105) |  |  |
|  | Do not award M1 if there is a clear indi | 2 2 2 | isunderstanding, eg |

| $\mathbf{5}$ (a) | Rotation | B1 | Any combined transformation is B0 |
| :--- | :--- | :--- | :--- |
|  | $90^{\circ}$ clockwise or $270^{\circ}$ | B1 | $-90^{\circ}$ or $+270^{\circ}$ |
|  | $(5,4)$ | B1 |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 5 and 4.5 | B1 | oe |  |
| :--- | :--- | :---: | :--- |
| $18 \times$ their $5 \times$ their 5 <br> or $20 \times$ their $4.5 \times$ their 4.5 | M1 | their 5 or 4.5 must come from $20 \div 4$ or $18 \div$ <br> 450 and 405 | A1 |
| Correct conclusion based on their <br> volumes if one volume correct. | Q1ft | Strand (iii) ft their volumes. |  |

## Additional Guidance

| Volume $A=18 \times 4 \times 4$ |  | B0 |
| :--- | :--- | :--- |
| Volume $B=20 \times 4.5 \times 4.5$ |  | M1 |
| $A=288$ and $B=405$ |  | Q1 |
| $B$ has the greater volume |  | B 1 |
| Volume $A=18 \times 5 \times 5$ | M 1 |  |
| Volume $B=20 \times 4.5 \times 4.5$ |  | A0 |
| $A=180$ and $B=405$ |  | Q1 |
| $B$ has the greater volume |  | B1 |
| Volume $A=18 \times 5 \times 5$ | Take 30 as misread. | M1 |
| Volume $B=30 \times 4.5 \times 4.5$ |  | A0 |
| $A=450$ and $B=607.5$ |  | Q1 |
| $B$ has the greater volume |  | B1 |
| Volume $A=18 \times 5 \times 5$ | Correct conclusion but | M1 |
| Volume $B=20 \times 4.5 \times 4.5$ | neither volume correct | A0 |
| $A=180$ and $B=180$ |  | Q0 |

| 7 | $\frac{x}{2}=-1 \text { or } x+10=8$ | M1 |  |
| :---: | :---: | :---: | :---: |
|  | -2 | A1 | $\begin{aligned} & \text { SC1 } 3 \text { from } x+5=8 \\ & \text { SC1 }-6 \text { from } x+10=4 \end{aligned}$ |
| 8 | $5 n+4$ | B2 | Do not accept $n 5$, but $n 5+4$ scores B1 B1 for $5 n$ <br> Accept $5 \times n$ or $n \times 5$ |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

| $6 x^{2}+15 x-4 x-10$ | M1 | Allow one sign or arithmetic error but must <br> have 4 terms. One in $x^{2}$, two in $x$ and a <br> constant term. |
| :--- | :---: | :--- |
| $6 x^{2}+11 x-10$ | A1 |  |

## Additional Guidance

9

| $6 x+15 x-4 x-10$ <br> $16 x-10$ | M0, A0 |  |
| :--- | :--- | :--- |
| $6 x^{2}+15 x+4 x-10$ <br> $6 x^{2}+19 x-10$ | M1, A0 |  |
| $5 x^{2}+15 x+4 x-10$ <br> $5 x^{2}+19 x-10$ | M0, A0 |  |

| Q Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| $3 x-3=x+4$ | M1 |  |
| :--- | :---: | :--- |
| $2 x=7$ | A1 |  |
| $(x=) 3.5$ | A1ft | ft their equation if of the form $2 x=a$ where $a$ <br> is not $-3,3$ or 4 <br> or of the form $b x=7$ where $b$ is not 1 or 3 |
| $($ Side $=)$ their $x+4$ or 7.5 or 56.25 | A1ft | ft their $x+4$ only if no further errors |
| 56 | B1ft | $\mathrm{ft} \mathrm{their}(x+4)^{2}$ rounded to the nearest whole <br> number only if no further errors. <br> $\mathrm{ft}(\text { their } x)^{2}$ and rounded to nearest whole <br> number, eg $x=3.5$ answer 12 <br> SC1 3x $+9 x-12$ if seen and no other <br> marks awarded. |

## Additional Guidance

NB follow through allowed on at most one error. After $2^{\text {nd }}$ error no further marks

| $\begin{aligned} & 3 x-3=x+4 \\ & 2 x=1 \\ & (x=) 0.5 \\ & 4.5^{2}=20.25 \\ & 20 \\ & \hline \end{aligned}$ | First error | M1 <br> A0 <br> A1ft <br> A1ft <br> B1ft |

| $2 x+1$ | A1 |  |
| $5 x+3=2 x+1$ | A0 |  |
| $3 x=-2$ |  |  |
| $x=-\frac{2}{3}$ |  |  |
| $(5 x-3)(5 x+3)$ | B1 |  |
| $(5 x-3)(2 x+1)$ | M1 |  |
| $\frac{5 x+3}{2 x+1}=3 x+2$ | A1 |  |

| Q Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| Alternative method 1 |  |  |
| :---: | :---: | :---: |
| $A F=10$ | B1 |  |
| Use of tan with 10 and 12 or use of $\sin$ with 10 and their $A G$ or use of cos with 12 and their $A G$ | M1 | $A G=\sqrt{ }\left(12^{2}+6^{2}+8^{2}\right) \text { or } 2 \sqrt{ } 61 \text { or }[15.6,$ 15.62] |
| $\begin{aligned} & \tan ^{-1}(10 \div 12) \\ & \text { or } \sin ^{-1}(10 \div A G) \\ & \text { or } \cos ^{-1}(12 \div A G) \end{aligned}$ | M1dep |  |
| [39.8, 40] | A1 | Values outside this range due to premature rounding score A0 unless correct value seen and subsequently rounded. |
| Alternative method 2 |  |  |
| $A F=10$ | B1 |  |
| $A G=\sqrt{ }\left(12^{2}+6^{2}+8^{2}\right)$ or $2 \sqrt{ } 61$ or [15.6, 15.62] | M1 |  |
| $\cos A G F=\frac{12^{2}+\mathrm{AG}^{2}-10^{2}}{12 \times 12 \times A G}$ | M1dep |  |
| [39.8, 40] | A1 | Values outside this range due to premature rounding score A0 unless correct value seen and subsequently rounded. |

## Alternative method 1

| $90=1 / 2 \times x^{2} \times \sin 60$ | M1 | oe |
| :--- | :---: | :--- |
| $x^{2}=180 \div \sin 60$ or $14.416 \ldots$ | M1dep | oe |
| $3 \times$ their $\sqrt{180 \div \sin 60}$ | M1dep |  |
| $[43.25,43.3]$ | A1 |  |

21
Alternative method 2

| height $=\sqrt{(2 x)^{2}-x^{2}}$ | M1 |  |
| :--- | :---: | :--- |
| $90=x \times \sqrt{3} x$ | M1dep |  |
| $\sqrt{90 \div \sqrt{3}}$ or $7.208 \ldots$ | M1 dep |  |
| $[43.25,43.3]$ | A1 | Values outside this range due to premature <br> rounding score A0 unless correct value seen <br> and subsequently rounded. |

| 22 | $9 m \times 2 m=10 n \times 5 n$ | M1 |  |
| :---: | :---: | :---: | :---: |
|  | $18 m^{2}=50 n^{2}$ or $m^{2}=\frac{50}{18} n^{2}$ | M1dep | oe |
|  | $m=\frac{5}{3} n$ | M1dep |  |
|  | $\frac{m}{n}=\frac{5}{3}$ | A1 |  |
