Mark Scheme (Results)
Summer 2013

GCSE Mathematics (2MB01) Foundation 5MB2F (Non Calculator) Paper 01

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk for our BTEC qualifications.
Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson.
Their contact details can be found on this link: www.edexcel.com/teachingservices.

You can also use our online Ask the Expert service at www.edexcel.com/ask. You will need an Edexcel username and password to access this service.

## Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## NOTES ON MARKI NG PRI NCI PLES

1 All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.

2 Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.

3 All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

4 Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.

5 Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

6 Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. The strands are as follows:
i) ensure that text is legible and that spelling, punctuation and grammar are accurate so that meaning is clear Comprehension and meaning is clear by using correct notation and labeling conventions.
ii) select and use a form and style of writing appropriate to purpose and to complex subject matter

Reasoning, explanation or argument is correct and appropriately structured to convey mathematical reasoning.
iii) organise information clearly and coherently, using specialist vocabulary when appropriate.

The mathematical methods and processes used are coherently and clearly organised and the appropriate mathematical vocabulary used.

## With working

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.
If working is crossed out and still legible, then it should be given any appropriate marks, as long as it has not been replaced by alternative work.
If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review, and discuss each of these situations with your Team Leader.
If there is no answer on the answer line then check the working for an obvious answer.
Any case of suspected misread loses $A$ (and B) marks on that part, but can gain the M marks. Discuss each of these situations with your Team Leader.
If there is a choice of methods shown, then no marks should be awarded, unless the answer on the answer line makes clear the method that has been used.

## 8 Follow through marks

Follow through marks which involve a single stage calculation can be awarded without working since you can check the answer yourself, but if ambiguous do not award.
Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

## 9 I gnoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: e.g. incorrect canceling of a fraction that would otherwise be correct
It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect e.g. algebra.
Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

## Probability

Probability answers must be given a fractions, percentages or decimals. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).
Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.
If a probability answer is given on the answer line using both incorrect and correct notation, award the marks.
If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.
11 Linear equations
Full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously indicated in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded.

12 Parts of questions
Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded in another.
13 Range of answers
Unless otherwise stated, when an answer is given as a range (e.g 3.5-4.2) then this is inclusive of the end points (e.g 3.5, 4.2) and includes all numbers within the range (e.g 4, 4.1)

## Guidance on the use of codes within this mark scheme

```
M1 - method mark
A1 - accuracy mark
B1 - Working mark
C1 - communication mark
QWC - quality of written communication
oe - or equivalent
cao - correct answer only
ft - follow through
sc - special case
dep - dependent (on a previous mark or conclusion)
indep - independent
isw - ignore subsequent working
```

## PAPER: 5MB2F_01

| Question |  | Working | Answer | Mark | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | (a) <br> (b) <br> (c) |  | Three thousand four hundred $\begin{gathered} \text { and sixty } \\ 300 \\ 6.04,6.37,6.48,6.5(0), 6.59 \end{gathered}$ | 1 <br> 1 <br> 1 | B1 oe <br> B1 cao <br> B1 cao |
| 2 | (a) (b) |  | obtuse <br> 125 | 1 <br> 1 | B1 cao <br> B1 accept 123 to 127 |
| 3 | (a) <br> (b) |  | $\begin{aligned} & 65 \\ & 1.7 \end{aligned}$ | $\begin{aligned} & 1 \\ & 2 \end{aligned}$ | B1 accept 64 to 66 <br> M1 for $3.4 \div 2$ <br> A1 cao |
| 4 | (a) <br> (b) <br> (c) |  | $-4$ <br> 3 <br> 4 | 1 <br> 1 <br> 1 | B1 cao <br> B1 for 3 or - 3 <br> B1 cao |
| 5 | (a) <br> (b) <br> (c) |  | $4 y$ $5 c d$ $5 a+3 b$ | $1$ <br> 1 $2$ | B1 cao <br> B1 cao <br> M1 for partial simplification $5 a$ or $+3 b$ A1 cao |

## PAPER: 5MB2F_01

| Question |  | Working | Answer | Mark | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 6 | (a) <br> (b) |  | $7$ $27$ | 1 <br> 1 | B1 for 7 or -7 <br> B1 cao |
| 7 | (a) <br> (b) |  | Isosceles triangle <br> Rectangle with perimeter 10 cm | $1$ <br> 2 | B1 for isosceles triangle <br> M1 for any rectangle or for a shape with perimeter 10 cm <br> A1 cao |
| 8 |  |  | 4.20 | 4 | B1 for using 7.55, 5.65 and 6.05 <br> M1 for adding 2 adult identical price tickets, and 2 child tickets (=26.8(0)) <br> M1 (dep on M1) for " 26.80 " - 22.60 or " 26.80 " 19.00 <br> A1 4.20 or 4.20 p |
| 9 |  |  | $\frac{7}{10}$ | 1 | B1 for $\frac{7}{10}$ oe |
|  | (b) |  | 30 | 1 | B1 cao |
|  | (c) |  | $\frac{2}{3}$ | 1 | B1 cao |

## PAPER: 5MB2F_01

| Question |  | Working | Answer | Mark | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 10 | (a) |  | 1008 | 1 | B1 cao |
|  | (b) |  | 28 | 1 | B1 cao |
|  | (c) |  | 1118 | 1 | B1 cao |
| 11 | (a) |  | 6 | 1 | B1 cao |
|  | (b) |  | Accurate drawing | 2 | B1 for at least one face correct or for any isometric drawing of a cuboid B1 accurate isometric drawing, any orientation Ignore presence of hidden lines |
| 12 | (a) |  | 5 | 1 | B1 for 5 |
|  | (b) |  | 60 | 2 | M1 for converting $£$ to Euros on the graph and multiplying appropriately e.g. $£ 10=12$ euros and $5 \times$ 12 <br> A1 for 60 |

## PAPER: 5MB2F_01

| PAPER: 5MB2F_01 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Question |  | Working | Answer | Mark | Notes |
| 14 |  | Reasons: <br> base angles of isosceles triangle are equal <br> with either <br> angles in a triangle add up to $180^{\circ}$ <br> and angles on a straight line add up to $180^{\circ}$ <br> or <br> angles in a triangle add up to $180^{\circ}$ and (exterior angle of a triangle is equal to the sum of the interior opposite angles) or <br> angles in a triangle add up to $180^{\circ}$ | $60^{\circ}$ with reasons | 4 | M1 for angle $D C B=20^{\circ}$ <br> M1 for a complete method to find $x$ <br> C1 (dep on at least M1) for one reason with correct geometrical language used C 1 (dep on M2) for 60 with full reasons with correct geometrical language used |

## PAPER: 5MB2F_01

| Question | Working | Answer | Mark | Notes |  |
| :---: | :---: | :---: | :---: | :---: | :--- |
| 15 |  |  | 90 | 3 | M1 for one division (eg $60 \div 10)$, may be implied by <br> correct number of marks on the diagram or correct <br> number on one edge of diagram or eg $6 \times 10$, or by two <br> of 6,5 and 3 seen <br> M1 for $(60 \div 10) \times(50 \div 10) \times(30 \div 10)$ <br> A1 cao <br> OR <br> M1 for $10 \times 10 \times 10$ or $60 \times 50 \times 30$ <br> M1 for $(60 \times 50 \times 30) \div(10 \times 10 \times 10)$ <br> A1 cao |
| 16 | (a) |  | $5 m+10$ | 1 | B1 cao <br> (b) |
| (c) |  | $y(y+3)$ | 1 | B1 cao | B1 cao |

## PAPER: 5MB2F_01

## PAPER: 5MB2F_01

## PAPER: 5MB2F_01

| Question |  | Working | Answer | Mark | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 19 |  | $4.5 \times 2+3 \times 2=15$ <br> or $4 \times 3+2 \times 1.5=15$ <br> or $4 \times 4.5-2 \times 1.5=15$ | 7 | 4 | M1 for a correct method to calculate at least one area using correct dimensions <br> M1 for a complete method to find the total area (can be implied by 15) <br> M1 for " 15 " $\div 2.25(=6.66 \ldots)$ or $2.25 \times 6(=13.5)$ or $2.25 \times 7(=15.75)$ or repeated addition to within 2.25 of " 15 " <br> C1 (dep on at least 1 method mark) for 7 packs clearly identified and supported by their calculations |

## Modifications to the mark scheme for Modified Large Print (MLP) papers.

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme.
The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:
Angles: $\pm 5^{\circ}$
Measurements of length: $\pm 5 \mathrm{~mm}$

## PAPER: 5MB2F_01

| Question |  | Modifications | Notes |
| :---: | :---: | :---: | :---: |
| 2 | (b) | Scales enlarged and simplified | Accept 120-130 |
| 5 | (c) | a changed to e, b to f | M1 for a partial simplification $5 e$ or $+3 f$ A1 for $5 e+3 f$ |
| 7 |  | 2cm grids (a) 'of centimetre square ' removed .(b)'On the grid of squares..' wording added: Each square on the grid represents a one centimetre square .' | M1 for any rectangle or for a shape with a perimeter of 10 cm (actual) or 10 cm (using the squares) <br> A1 for a rectangle with a perimeter of 10 cm (actual) or 10 cm (using the squares) |
| 11 |  | Part (a) and (c) have a model as well as adiagram . Part (a):no measurements put on them <br> Part (b):Question changed as follows: <br> 'Look at the diagram for Question 11(b).On the centimetre isometric grid, a cuboid has been drawn. Write down the length of the three dimensions 4 cm by 3 cm by 5 cm . | B2 marks for 4 cm by 3 cm by 5 cm . <br> (B1 for 2 of the dimensions correctly given (and one incorrect or missing)) |

## PAPER: 5MB2F_01

| Question |  |  |  |
| :---: | :--- | :--- | :--- |
| 12 |  | Both axes 2cm for 1 | Notes |
| 15 |  | Both models and diagram are provided | Standard mark scheme |
| 16 | (c) | MLP only : a changed to e | B1 for $e^{9}$ |
| 18 |  | 2cm grid top row removed | Standard mark scheme |
